### Standard and customized tanks

In this brochure Padoan presents the “N” tanks, the standard solutions available for our clients. Our R&D dept. is at your disposal to find the best solution to fit your needs with customized products. Feel free to contact us at [info@padoan.it](mailto:info@padoan.it).

## our point of view

**Family company since 1937**, we are **manufacturer of oil, diesel-oil and combined tanks** for industrial vehicles and machineries.

Our strong focus on R&D, innovation, technology and support to our customers is translated into action by the **Italian headquarter and subsidiary companies** in Switzerland, Germany and Chile: PADOAN GROUP.

We develop our products working side by side with our customers who mainly are **bodybuilders, OEMs and distribution networks** in more than 50 Countries worldwide.

The **Italian design and quality mark out our wide range of tanks that is divided in “N” (the standard and multipurpose line) and “X”, tanks which are designed and customized according to the customer and application needs.**

**Do not hesitate to contact us to reach your goals.**

Our mission and vision can be expressed by our payoff: **WETANKYOU since 1937.**

We want to be a partner more than a supplier, working by your side and reaching your goals.

That is the reason why every day we *Th*ANK people and companies who trust us as a partner to develop their projects and strategies.

At the same time we *Th*ANK our team of more than 200 people worldwide who, for more than 80 years, provides quality and value we share with you.

### RAW MATERIAL USED IN AUTOMOTIVE FIELD

The material we use guarantees resistance, finishing, longer life expectancy, high quality perception to create premium products.

### AUTOMATIZED WELDING PROCESS

For several years our welding process has been carried out by automatized robots, through the adoption of the MIG/MAG technology.

This allows a better internal cleaning avoiding the contamination normally caused by manual or standard welding.

### PAINTING PROCESS

The painted steel tanks are finished with an epoxy powder coating (from 70 to 180  $\mu$ ) to guarantee the protection from aggressive agents.

Moreover, on request, primer is also applied for a further protection.

### RELIABILITY TEST WITH CRACK TESTING MACHINE

All of our tanks components, including brackets and straps, are tested with our cracking vibration machine to verify the life expectancy and quality of our products.

### QUALITY TEST 1:1 WITH LEAK DETECTOR

Every tank is tested through an automatized machinery to verify any microscopic loss, using helium technology.

Every tank is marked with a label to indicate it has been tested and approved.

All rights reserved to Padoan srl. It is not allowed any kind of copy or use of information or pictures contained in this brochure.

Pictures and descriptions provided for our products are not to scale and are intended for illustrative purposes only.

Padoan is not responsible for any mistake or inaccuracy.

The Company reserves the right to change the technical features of the products without prior notice.

#### MULTIFITTINGS SIDE INSTALLATION KIT

Our brackets are designed with a multipurpose fixing holes solution that grants a wide range of mounting combination on different chassis.

#### STAINLESS STEEL STRAPS AND CRADLE MOUNTING KIT

The correct positioning of the tanks is fundamental to guarantee a lasting application. This is the reason why we only use stainless steel straps which are resistant to the weather conditions and to rusting, and cradle mounting kits which fasten the tank by reining it in and avoid damages due to vibrations.

#### EPDM PROTECTION

The particular design allows to protect hands and materials from the cutting edge. The EPDM is installed on straps and brackets. This specific material, compared to PVC, maintains its features in a wider range of temperature (-45°, +150°).

#### INTERNAL CLEANING

Upon request, a specific and innovative working station is available for the internal flushing of our aluminium and stainless steel tanks. This process is optional, and represents a further step towards the optimization of the cleaning process. Padoan adopts ISO 16232 as reference to analyze the cleanliness of its flushed tanks.

#### EXTERNAL CLEANING

We take care of the finishing of each tank. To emphasize the quality of processes and materials a manual cleaning is carried out by our team.

#### PRODUCT IDENTIFICATION WITH DISTINCTIVELY LABEL

Each tank is identified through a serial number. This individual "identity card" allows the traceability through the whole production chain and simplifies the communication between the customer and the supplier, for any needs.

#### INSTRUCTIONS FOR ANY INSTALLATION KIT

All tanks and kits are supplied with instructions, to give the installers all the necessary key-points to save time and ease the assembly process. Instruction are available in four languages.

#### PROTECTIVE SHELLS AND HIGH RESISTANCE CARDBOARD

No additional costs for the high quality protection guaranteed by shells tailored for each type of sidewall sizing and by the high resistance cardboard.

#### PROMPT DELIVERY

Quality and efficiency are part of our vision, managed also with a wide range of tanks and accessories to ensure a prompt delivery to our clients. More than 3.500 tanks, in fact, are always on stock with a constant turnover.
